

WILD WOOD OILS *of Australia*

WA SANDALWOOD OIL

WA Santalum Spicatum

Sandalwood is cherished across the globe for its soothing aroma, skin-supporting properties, and grounding effects in meditation and spiritual rituals. In ancient traditions, it has been burned as incense, used in sacred ceremonies, and applied to calm the body and mind.

WA Sandalwood, scientifically known as *Santalum spicatum*, is native to the semi-arid woodlands of Western Australia and offers a uniquely dry and balsamic scent profile.

WA Sandalwood differs from other species with its earthy, slightly spicy character. It is widely respected in natural perfumery and aromatherapy for its ability to centre the senses and provide a long-lasting, mellow depth. For thousands of years, Indigenous Australians have worked with this native species- burning it in cleansing ceremonies and using its essence to soothe the skin and spirit.

CHARACTERISTICS

WA Sandalwood Oil is a clear to pale yellow oil with a dry, woody aroma. It carries subtle sweetness and warm balsamic tones, making it distinct from Indian or Northern sandalwood varieties.

USAGE

WA Sandalwood Oil is valued for its calming, anti-inflammatory properties, making it ideal for use in natural skincare. It plays a key role in essential oil and aromatherapy blends that support emotional balance and relaxation. In perfumery, it serves as a grounding and long-lasting base note, while in meditation and

spiritual practices, it enhances stillness and mental clarity. Its antibacterial and skin-healing qualities also make it a versatile addition to wellness and personal care formulations.

COMPLEMENTS

WA Sandalwood pairs seamlessly with a variety of complementary scents - from floral notes like lavender, geranium, and ylang-ylang, to bright citrus oils such as lemon, mandarin, and sweet orange. It also harmonises well with deep, earthy tones including frankincense, buddha wood, patchouli, and cedarwood. Its dry, grounding character makes it a foundational ingredient in both therapeutic blends and natural fragrance creations.
